

Junior Linguist [Italian]

Job Title:

Junior Linguist [Italian]

Linguistic Field(s):

Phonology, Morphology, Semantics, Syntax, Lexicography, NLP

Location:

Milan, Italy

Job description:

The role of the Junior Linguist is to annotate and review linguistic data in Italian. The Junior Linguist will also contribute to a number of other tasks to improve natural language processing. The tasks include:

- Annotating and reviewing linguistic data
- Labeling text for disambiguation, expansion, and text normalization
- Annotating lexicon entries according to guidelines
- Phonemic transcription of lexicon entries
- Evaluating current system outputs
- Deriving NLP data for new and on-going projects
- Be able to work independently with confidence and little oversight

Minimum Requirements:

- Native speaker of Italian and fluent in English
- Experience in annotation work
- Knowledge of phonology, semantics, syntax, morphology or lexicography
- Excellent oral and written communication skills
- Attention to detail and good organizational skills

Desired Skills:

- Degree in Linguistics or Computational Linguistics
- Ability to quickly grasp technical concepts; learn in-house tools
- Keen interest in technology and computer-literate
